Energy Medicine Pilot Study

- 30-minute energy medicine session
- 196 participants seeking relief from hand & wrist pain

• Prospective, within-subject design
• No control condition (all subjects received authentic treatment)
What is Channeling?

Channeling is the process of revealing information and energy not limited by our conventional notions of space and time.

The process includes reception and expression of this information and energy.

Seer Data Analysis

- Read through everything once to become familiar with the data (no taking notes at this stage).
- Read through everything, this time taking notes on general observations and themes.
- Read through everything, this time generating a list of broad, potential “parent” codes.
- Read through everything a fourth time, this time generating more specific, potential “child” codes.
- All data coded

**Seer Perceptions**

1) Participants’ physical caused by multiple etiologies: physical, emotional (especially traumatic), spiritual, and energetic

2) Participant - practitioner relationship is important

3) Healing process unique to individual – not fixed to practitioner

4) Energy exists in the space within, between participant & practitioner

5) Energy can be manipulated

6) Practitioner affects this energy, either alone or with assistance from ostensible non-physical beings, through various techniques with the intention of healing the participant

7) Energy characteristics: action, movement, color, intensity, shape, meaning, and purpose or intention

8) These characteristics change as session ensues, perceived healing occurs.
Seer Data Analysis

• 119 binary variables, one for each code.
• linear regression models
